ADVANCES IN EQUINE NUTRITION IV

KER has added to its collection of hardbound volumes with the recent publication of *Advances in Equine Nutrition IV*. The entire collection will be available electronically as a CD.

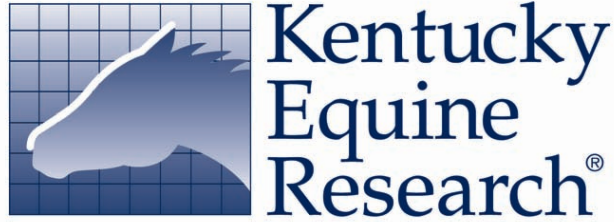

Kentucky Equine Research (KER) recently published a fourth volume in its popular *Advances in Equine Nutrition* series of books. Like its predecessors, *Advances in Equine Nutrition IV* is a compilation of articles that first appeared in proceedings of nutritional conferences organized by KER. The new text covers those conferences staged in 2004, 2006, and 2008.

This volume's 39 individual papers are divided into five sections: general nutrition, nutrition and management of the performance horse, nutrition and management of the broodmare, nutrition and management of the growing horse, and pathological conditions. Each paper features the latest information presented by international authorities in various fields of equine health and nutrition.

Included among the authors are KER's equine nutritionists: Drs. Joe Pagan, Larry Lawrence, Peter Huntington, and Clarissa Brown-Douglas. Other notable researchers that contributed to this volume include Drs. Laurie Lawrence (University of Kentucky), Stephanie Valberg (University of Minnesota), Wayne McIlwraith (Colorado State University), Nathaniel White (Marion duPont Scott Equine Medical Center), and Frank Andrews (University of Tennessee).

Advances in Equine Nutrition IV, hardcover with over 400 pages, is now available for purchase. In addition to this fully-indexed book, a CD is available that contains every article published in the *Advances in Equine Nutrition* series. That's over 2,000 pages of equine nutritional and health-care archives!

To purchase the book or the CD, go to www.ker.com and follow the steps in "Find a Product or Service" or call KER at 859-873-1988 to place an order.
